

Impulse Response: Effect of MPS × Informality on GDP Growth

δ_h from: $\Delta y_{t+h} = \alpha_i + \lambda_t + \beta \cdot \text{MPS} + \gamma \cdot \text{MIMIC} + \delta \cdot (\text{MPS} \times \text{MIMIC}) + \theta' X + \varepsilon$

Shaded areas: 90% (dark) and 95% (light) confidence intervals. Country-clustered SEs.
